# III. Summary of Evidence

Clinical trials have demonstrated the efficacy and safety of aflibercept (Eylea/Eylea HD) in the treatment of neovascular (wet) age-related macular degeneration (nAMD). Key findings from clinical trials include significant improvements in visual acuity, reduction in central retinal thickness, and decreased progression of choroidal neovascularization compared to placebo. Eylea has been shown to maintain or improve visual function and quality of life in patients with neovascular AMD. Eylea HD every 12 and 16 weeks demonstrated non-inferiority to Eylea every

8 weeks in the treatment of nAMD, diabetic macular edema (DME) and diabetic retinopathy (DR) with similar improvements in visual acuity or disease severity.

# VI. Dosage/Administration 1,2

Indication	Dose
Indication  Neovascular (Wet)  AMD	Eylea Only Initiation: Administer 2 mg intravitreally per affected eye once every 4 weeks (approximately every 28 days, monthly) for the first 12 weeks (3 months)  Maintenance: Administer 2 mg intravitreally per affected eye once every 8 weeks (2 months); however, Eylea may be dosed as frequently as 2 mg every 4 weeks (approximately every 25 days, monthly)  Additional efficacy was not demonstrated in most patients when EYLEA was dosed every 4 weeks compared to every 8 weeks. Some patients may need every 4 week (approximately monthly) dosing after the first 12 weeks (3 months).  Patients may also be treated with one dose every 12 weeks after one year of effective therapy  Eylea HD Only The recommended dose is 8 mg administered by intravitreal injection every 4 weeks (approximately

# Appendix 2 – Centers for Medicare and Medicaid Services (CMS)

Medicare coverage for outpatient (Part B) drugs is outlined in the Medicare Benefit Policy Manual (Pub. 100-2), Chapter 15, §50 Drugs and Biologicals. In addition, National Coverage Determination (NCD), Local Coverage Determinations (LCDs), and Local Coverage Articles (LCAs) may exist and compliance with these policies is required where applicable. They can be found at: <a href="https://www.cms.gov/medicare-coverage-database/search.aspx">https://www.cms.gov/medicare-coverage-database/search.aspx</a>. Additional indications may be covered at the discretion of the health plan.

Aflibercept (Eylea®/Eylea HD®) was reviewed by the Neighborhood Health Plan of Rhode Island Pharmacy & Therapeutics (P&T) Committee. Neighborhood adopted the following clinical coverage criteria to ensure that its members use aflibercept (Eylea®/Eylea HD®) according to Food and Drug Administration (FDA) approved labeling and/or relevant clinical literature. Neighborhood worked with network prescribers and pharmacists to draft these criteria. These criteria will help ensure its members are using this drug for a medically accepted indication, while minimizing the risk for adverse effects and ensuring more cost-effective options are used first, if applicable and appropriate. For INTEGRITY (Medicare-Medicaid Plan) members, these coverage criteria will only apply in the absence of National Coverage Determination (NCD) or Local Coverage Determination (LCD) criteria. Neighborhood will give individual consideration to each request it reviews based on the information submitted by the prescriber and other information available to the plan.
