

Neighborhood Delegates Physical Medicine and Advanced Radiology

Services to Evolent Health

July 2024

Neighborhood Health Plan of Rhode Island (Neighborhood) has delegated utilization management review to Evolent Health (Evolent) for all advanced imaging and physical medicine services.

Please note that Neighborhood ended its partnership with eviCore effective **June 1, 2024**. Authorizations for radiology services granted by eviCore **will remain active until the approved authorization end date**.

All services under Evolent's solutions require prior authorization including non-emergent, advanced, and outpatient imaging; and outpatient rehabilitative and habilitative physical medicine services. Neighborhood continues to oversee claims adjudication.

Impacted Lines of Business

Evolent's solutions impact the following Neighborhood lines of business:

- Advanced imaging (All lines of business)
- Physical medicine (Medicaid and Commercial)

Impacted Services

As of **June 1, 2024**, the following advanced imaging services **continue to require prior authorization**:

- Radiology
 - MRI (Magnetic Resonance Imaging)
 - MRA (Magnetic Resonance Angiography)
 - CT/CTA (Computed Tomography)
 - PET (Positron Emission Tomography)
- Radiology – Cardiology Focus
 - CCTA (Coronary Computed Tomography Angiography)
 - Nuclear Stress (Myocardial Perfusion Imaging (MPI))
 - MUGA Scan

As of **June 15, 2024**, the following advanced imaging and physical medicine services also **require prior authorization**.

- Radiology – Cardiology Focus
 - Stress Echocardiography
 - Echocardiography
- Physical Medicine
 - Physical Therapy
 - Occupational Therapy
 - Speech Therapy

In addition, as of **June 15, 2024**, the following CPT codes are considered non-covered services:

Category	New Code	Description
CCTA	0623T	Automated quantification and characterization of coronary atherosclerotic plaque to assess severity of coronary disease, using data from coronary computed tomographic angiography; data preparation and transmission, computerized analysis of data, with review of computerized analysis output to reconcile discordant data, interpretation, and report.
CCTA	0624T	Automated quantification and characterization of coronary atherosclerotic plaque to assess severity of coronary disease, using data from coronary computed tomographic angiography; data preparation and transmission.
CCTA	0625T	Automated quantification and characterization of coronary atherosclerotic plaque to assess severity of coronary disease, using data from coronary computed tomographic angiography; computerized analysis of data from coronary computed tomographic angiography.
CCTA	0626T	Automated quantification and characterization of coronary atherosclerotic plaque to assess severity of coronary disease, using data from coronary computed tomographic angiography; review of computerized analysis output to reconcile discordant data, interpretation, and report.
CCTA	0710T	Noninvasive arterial plaque analysis using software processing of data from non-coronary computerized tomography angiography; including data preparation and transmission, quantification of the structure and composition of the vessel wall and assessment for lipid-rich necrotic core plaque to assess atherosclerotic plaque stability, data review, interpretation, and report
CCTA	0711T	Noninvasive arterial plaque analysis using software processing of data from non-coronary computerized tomography angiography; data preparation and transmission
CCTA	0712T	Noninvasive arterial plaque analysis using software processing of data from non-coronary computerized tomography angiography; quantification of the structure and composition of the vessel wall and assessment for lipid-rich necrotic core plaque to assess atherosclerotic plaque stability
CCTA	0713T	Noninvasive arterial plaque analysis using software processing of data from non-coronary computerized tomography angiography; data review, interpretation, and report
CT	0633T	Computed tomography, breast, including 3D rendering, when performed, unilateral; without contrast material
CT	0634T	Computed tomography, breast, including 3D rendering, when performed, unilateral; with contrast material(s)
CT	0635T	Computed tomography, breast, including 3D rendering, when performed, unilateral; without contrast, followed by contrast material(s)
CT	0636T	Computed tomography, breast, including 3D rendering, when performed, bilateral; without contrast material(s)
CT	0637T	Computed tomography, breast, including 3D rendering, when performed, bilateral; with contrast material(s)
CT	0638T	Computed tomography, breast, including 3D rendering, when performed, bilateral; without contrast, followed by contrast material(s)

MR	0609T	Magnetic resonance spectroscopy, determination, and localization of discogenic pain (cervical, thoracic, or lumbar); acquisition of single voxel data, per disc, on biomarkers (i.e., lactic acid, carbohydrate, alanine, lactate, propionic acid, proteoglycan, and collagen) in at least three discs
MR	0610T	Magnetic resonance spectroscopy, determination, and localization of discogenic pain (cervical, thoracic, or lumbar); transmission of biomarker data for software analysis
MR	0611T	Magnetic resonance spectroscopy, determination, and localization of discogenic pain (cervical, thoracic, or lumbar); postprocessing for algorithmic analysis of biomarker data for determination of relative chemical differences between discs
MR	0612T	Magnetic resonance spectroscopy, determination, and localization of discogenic pain (cervical, thoracic, or lumbar); interpretation and report
MRI	76391	Magnetic resonance (e.g., vibration) elastography
MRI	0648T	Quantitative magnetic resonance for analysis of tissue composition (e.g., fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation, and report, obtained without diagnostic MRI examination of the same anatomy (e.g., organ, gland, tissue, target structure) during the same session.
MRI	0649T	Quantitative magnetic resonance for analysis of tissue composition (e.g., fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation, and report, obtained with diagnostic MRI examination of the same anatomy (e.g., organ, gland, tissue, target structure) (List separately in addition to code for primary procedure).
MRI	0697T	Quantitative magnetic resonance for analysis of tissue composition (e.g., fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation, and report, obtained without diagnostic MRI examination of the same anatomy (e.g., organ, gland, tissue, target structure) during the same session; multiple organs
MRI	C9762	Cardiac magnetic resonance imaging for morphology and function, quantification of segmental dysfunction; with strain imaging
MRI	C9763	Cardiac magnetic resonance imaging for morphology and function, quantification of segmental dysfunction; with stress imaging
Nuclear Cardiac Imaging	75580	Noninvasive estimate of coronary fractional flow reserve (FFR) derived from augmentative software analysis of the data set from a coronary computed tomography angiography, with interpretation and report by a physician or other qualified health care professional.

Note: Effective June 1, 2024, Neighborhood's payment policies have been updated to align with the changes noted above. New clinical medical policies are available on our website.

Evolut Online Portal

Providers can request access to Evolut's online portal for advanced imaging and physical medicine services by visiting Evolut's website and [completing the registration process](#).

Before rendering any services, providers should note:

- Ordering or rendering providers are responsible for obtaining authorization prior to rendering advanced imaging and cardiac services or physical medicine treatment.
- Providers rendering any of the services listed above should verify that the necessary authorization has been obtained by [signing in on Evolut's website](#) or calling Evolut at 1-877-469-7949. Failure to do so may result in non-payment of claims.

- Emergency room, observation, and inpatient imaging procedures do not require authorization through Evolent.

Provider Support

Please [click here](#) for additional information on advanced imaging and physical medicine services including:

- Frequently asked questions
- Quick reference guide
- Utilization review matrix
- Provider education presentation

Neighborhood appreciates your continued commitment to providing quality care to our members. If you have any questions regarding this notification, please contact Provider Services at 1-800-963-1001.
