

Cost Saver Program for Commercial Members

Neighborhood News – October 2024

On January 1, 2024, Neighborhood Health Plan of Rhode Island's (Neighborhood) Pharmacy Department introduced a new initiative for Commercial plan members through the Pharmacy Benefit Manager. This initiative, conducted at the point of sale, determines whether a prescribed product is less expensive for the member when purchased using a discount card compared to the contracted insurance rate.

If determined that the discount card offers a lower price, the claim will be processed using the discount card pricing. This approach ensures that our members benefit from a lower cost share.

Please note that this program applies exclusively to Neighborhood's Commercial plan members and does not extend to our Medicaid or INTEGRITY (MMP) plans.
