

## NaviNet's New Feature: Patient List

### Neighborhood News – October 2024

[NaviNet](#) is offering a new feature called "Patient List" which allows providers to quickly access eligibility and benefits information as well as claim status directly from their patient list.

#### How It Works

The "Patient List" populates with patient information as soon as their eligibility is checked. This enables quick access to critical information without the need for multiple logins or navigation through different webpages.

#### Benefits of the Patient List

- **Streamlined Processes:** Access eligibility and claims status in one place, reducing the time spent on administrative tasks.
- **Immediate Access:** Information is updated in real-time, ensuring you have the latest data at your fingertips.
- **Centralized Information:** Keeps all necessary patient details in one accessible location, simplifying patient management.
